

Control Panels

- Multi Starter Panels—customized to meet any requirement
- Single Starter Panels with any voltage, HP rating, with or without control transformers and any controls on the door
- Combo Panels available with multiple voltages
- Catwalk packages available
- Customized test panels available for any application
- Customized Control Consoles available—Any style of switches, buttons, lights, joysticks and digital displays requested. Cables included, hardwired, plug and play, custom molded cables and receptacles, etc.
- AEC also has its own electric over hydraulic test bench, which allows us to ensure all custom panels that leave the shop meet our high standards.

Amaritech Electric & Controls Ltd.

At Amaritech we assist our clients to achieve their goals by identifying their electrical and automation needs and providing flexible solutions on a timely basis, while always ensuring that quality is at the forefront.

The company is staffed with knowledgeable, experienced electricians who take pride in providing quality workmanship. Amaritech has its own ETL certified panel shop and is equipped with fully stocked service trucks. Amaritech provides a variety of services, from ground-up design and construction, to maintenance and service of existing equipment.

Amaritech now has branches in Calgary, Red Deer, and Nisku to service you better.
